

## NAFA CERTIFIED TECHNICIAN PROGRAM

The **NAFA Certified Technician (NCT) Program** was first introduced to NAFA members in January 1999 as an effort to add more credibility and professionalism to the air filtration industry. Since its introduction, over 79 air filter service technicians have taken the 100-question, open-book exam based on the NAFA *Installation, Operation, and Maintenance of Air Filtration System* manual.

Almost immediately after the program became available, interest started growing to make this program available to a much wider audience than just the NAFA membership. NAFA members, in particular those who are Certified Air Filter Specialists (CAFS) saw the NCT program as an opportunity to spread knowledge and professionalism to technicians they encountered in the workplace. As stated in the Certification Policies and Procedures, a CAFS must administer the NCT examination to exam candidates.

**NCT certification is available now!** There is a one-time administration fee of \$150.00 per company, plus a fee of \$125.00 per each individual exam that is administered. Candidates who score at least a 70% on the exam are presented with a certificate from NAFA Headquarters as well as two NCT patches. Certification requires only one continuing education credit each year for annual renewal, as well as completion of the renewal application and payment of \$25.00 renewal fee.

Please complete the [NAFA Certified Technician Application Form](#) and return to TAFFCO/Airpure.
